

Memory Care

288 square feet

Private apartments in the Secured Memory Care Assisted Living are specifically designed to promote the health, safety and quality of life of our residents. Apartments design and finishes were carefully chosen to reduce fear and anxiety. For instance, there is limited contrast between bathroom and bedroom flooring, personalize room entry and thoughtful object placement. Our goal was to build a space that is a tool to help those with dementia to live more peacefully, more securely in a world they can understand.
